Instructions

This is a two part puzzle.

The right side is a puzzle where each four letter word is one letter different from the previous word.

The left side is a set of words missing four letters each and replaced with blank spaces.

Find a set of words that fulfills the right side of each puzzle, and where the letters can be placed in the blanks at left in some order to make another word.

The first and last word of each puzzle is given to get you started, and the first puzzle has an extra word given as an example.

Some words also have a clue given.

Errata

A clue had the incorrect letter given in the bottom left puzzle, but is fixed thanks to a tip from James.
