

Lannieland

A logic puzzle about the greatest thrift store in the world.

Four friends went to Lannieland one day to find some great thrift store buys. They each spent a different amount of money and each got some random item(s). Use the clues to deduce who bought what and for how much money.

1. Chantel spent exactly \$3 more than another person in the group.
2. The person who bought the left shoes spent more than Becky.
3. The pirate hat, which cost \$5, was not bought by Chantel.
4. The earrings cost \$2.
5. Becky bought the dinosaur figurines.

	3 Left Shoes	A set of dinosaur toys	Some big 60's earrings	A pirate hat	\$2	\$4	\$5	\$7
Becky			/					
Chantel			/					
Dave			/					
Nicole	/	/	★	/				
\$2								
\$4								
\$5								
\$7
